

FOR Embitel Technologies India Pvt Ltd.

Barcode number should be enter while invoice generation and save in invoice item and order item table and print the barcode to scan in invoice and save the product mrp in order item and invoice and display in invoice print

Objective of the Project

- Implementation of the barcode number field while entering into the invoice generation
- Based on the quantity the barcode number should be displayed.
- After submitting the data, a verification of the invoice generation should be saved in the invoice item table.
- Check that the product MRP is being saved in the order item and the invoice.
- Make sure the product MRP is visible when printing an invoice.

Technologies Used

To implement the requirement we use

- Magento 2

Final Solution

- We had to implement to send the product MRP value from sales_invoice_item to sales_order_item table.
- Before that we need to save the MRP in quote_item table. For that we identified Event name and write the Observer code.
- For this we referred many core modules and google and try to send the data from sales_invoice_item and sales_order_item table.

Open Bugs

- After submitting the data, a verification of the invoice generation should be saved in the invoice item table but it is not able to saving in sales_order_item table.

Thank you!

- Surabhi
- Kuruba Bhavani
